

DIGITAL VIDEO CAMERA WITH INSTANT BROADCASTING CAPABILITY

ABSTRACT

5 A digital video camera which has instant broadcasting capability includes a general
portable small size digital video camera linking to a mobile communication network.
The digital video camera has a wireless transmission module and a Subscriber Identity
Module (SIM) card to enable user to access the digital data services offered by the
mobile communication network thereby to transmit recording image and audio data
10 instantly to remote sites without using the SNG facility for achieving onsite and instant
broadcasting object.
